

# One-and-One Revisited

**Michele is a 60% free-throw shooter and is in a one-and-one situation.**

**(Reminder: A team is in a one-and-one situation when the opposing team has committed at least 7 team fouls. In a one-and-one situation, a player will get one free throw attempt. Then, if the first one is made, that player will get a second free throw attempt.)**

**Over 100 trials, how many points would Michele expect to make at the free-throw line in a one-and-one situation?**
