

Available Installers

	Platform	without Java VM	Instructions
	 Windows	Download (11.6M)	View
>	 Mac OS X	GeoGebra WebStart	(*)
	 Linux	Download (11.5M)	View
	 Other Java-enabled Platforms	Download (12.2M)	View

Windows Instructions:

Instructions

- After downloading, double-click **GeoGebra_3_0_0_0.exe**

Notes

- You may need to install a Java 1.4.2 or later virtual machine. You can download one from [Sun's Java web site](#).

Mac OS X Instructions:

(*) Mac OS X Installer, July 3, 2008: please use GeoGebra WebStart on Macs until we have fixed an important problem with our current Mac installer. We will update this page as soon as a new installer is available.

Instructions

- After downloading, double-click **GeoGebra_3_0_0_0**

Notes

- Requires Mac OS X 10.3 or later
- Be sure you have Java 1.4.2 or later installed. You can download Java from [Apple's web site](#)
- The compressed installer should be recognized by Stuffit Expander on Mac OS X 10.3 or by the build-in Archive Utility on Mac OS X 10.4 or later and should automatically be expanded after downloading. If it is not expanded, you can expand it manually using [Stuffit Expander 6.0 or later](#) on Mac OS X 10.3 or using the build-in Archive Utility on Mac OS X 10.4 or later.
- If you have any problems launching the installer once it has been expanded, make sure that the compressed installer was expanded using Stuffit Expander on Mac OS X 10.3 or using the build-in Archive Utility on Mac OS X 10.4 or later. If you continue to have problems, please contact technical support.

Linux Instructions:

Instructions

- After downloading open a shell and, **cd** to the directory where you downloaded the installer.
- At the prompt type: **sh ./GeoGebra_3_0_0_0.bin**

Notes

- You need to install a Java 1.4.2 or later virtual machine. You can download one from [Sun's Java web site](#) or contact your OS manufacturer.

All Other Platforms Instructions:

Instructions (Unix or Unix-like operating systems)

- After downloading, type
`java -jar GeoGebra_3_0_0_0.jar`
- If that does not work, try
`java -classpath [path to]classes.zip:GeoGebra_3_0_0_0.jar
install`
- If that does not work either, on sh-like shells, try
`cd [to directory where GeoGebra_3_0_0_0.jar is located]
CLASSPATH=GeoGebra_3_0_0_0.jar
export CLASSPATH
java install`
- Or for csh-like shells, try
`cd [to directory where GeoGebra_3_0_0_0.jar is located]
setenv CLASSPATH GeoGebra_3_0_0_0.jar
java install`

Instructions (for other platforms)

- Be sure you have Java 1.4.2 or later installed. You can download Java from [Sun's Java web site](#)
- In a console window, change to the directory where you downloaded **GeoGebra_3_0_0_0.jar** to before running the installer
- Your operating system may invoke Java in a different way. To start the installer, add **GeoGebra_3_0_0_0.jar** to your **CLASSPATH**, then start the main class of the installer named **install**
