

What Is Problem Solving?

Allow 10-15 minutes for each member of your group to read one of the sets of definitions of problem solving. Then share the contents of the four sets of definitions.

1. Each member of your group of four will read a different set of definitions. Use highlighter, etc., to help you remember key points in each definition.
2. After step 1 is completed, share within your group what you learned from the definitions you read.

What Is Problem Solving?

1. When your group has completed the process of sharing the four sets of definitions, spend time discussing how you would define problem solving.
2. Use the markers and one sheet of chart paper to create a presentation of your current definition of

Problem Solving	
What It Is	What It Is Not

3. Choose one or more members of your group to talk briefly about your definition.
4. Post your definition after the discussion.
